

Bring Your Meeting To Your Desktop!

Session™ lets you have all the benefits of face-to-face meetings with business associates, colleagues, or friends anywhere in the world without ever leaving your desktop.

Session Audio/Video Service

Session provides you cost effective unlimited use of point-to-point audio, video and text communications over the Internet.

No special purpose hardware is needed and it works in conjunction with most networks, including the Internet.

Save time and travel cost by visiting anyone in the world from the comfort of your computer. It works on PC or Mac, desktop or laptop, and provides business quality service at a fraction of the cost of traditional legacy systems. Plus, it's expandable to multi-point conferencing and collaboration.

Session Multipoint Conferencing Service

Session delivers multi-point conferencing for voice, video, data, or all three at the same time. Meet with multiple participants without purchasing expensive hardware. Use it as often as you want, there's no charge for minutes.

Session PictureTalk™ Data Collaboration Service

Session enables participants to work together sharing and collaborating any application, including Microsoft® Office. Make presentations, annotate, perform directed web browsing (web tours), share the entire desktop, poll, record data presentations, and much more.
